1. General Information

1.1 System Overview

Inventory and Billing Management System is an online based inventory management system developed by Phye Gan Pvt. This is V1.0 version. This system helps businesses keep track of their stocked products.

The system involves various steps, such as ordering, receiving, storing, and packing goods. The use of hardware and software facilitates tasks like real-time tracking, order processing, and generating reports. By employing an IMS, businesses can efficiently manage their inventory, reduce costs, improve efficiency, and enhance customer satisfaction. The system provides valuable data for informed decision-making, making it a crucial tool for effective supply chain management.

This Inventory and Billing Management System is developed as per the guidelines of the Inland Revenue Department (IRD) and is IRD-approved. Hence, any kind of change in the system requires the approval of the IRD and cannot be changed directly.

2. System Summary

2.1 Browsing System

As the Inventory and Billing management system is an online system, it is not necessary to install it on each computer. To browse the computer must be in the network and connected to the server on which the system is installed.

2.2 Modules

The module consists of four modules i.e. Master Data, Utilities, Reports, and Security. Master Data is generally for adding the main data of the system where the master data module consists of three sub-modules i.e. Product, General, and License.

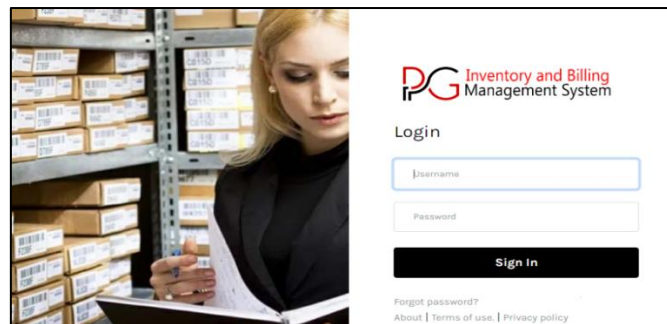

2.3 User Access

As per requirement, different users can be created with different user access. For example, a user can be created with administrative privilege that can do everything in the system, a user with data entry privilege, who can enter data and view data, and similarly user with only view privilege, who can view only reports.

3. Getting Started

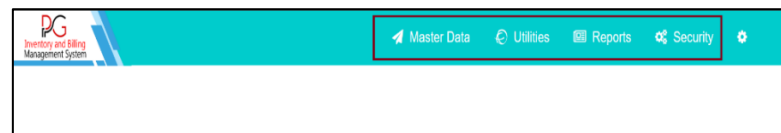

3.1 Logging In

To log in to the system, the user can browse the system through any browser as mentioned in the previous section. The user must enter the local URL: 192.168.1.5/ims(mean to be changed if ip of the server is changed). After this, a login page is displayed where the user can enter a username and password to access the system.

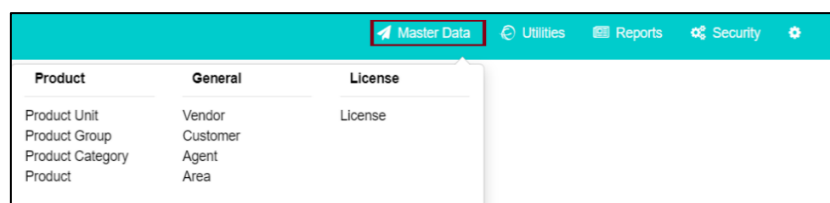

3.2 System Modules

After a valid login from the account user, we will get four modules, Master Data, Utilities, Reports, and Security.

4. Master Data

This module is for entering the main data in the system. This module consists of three sub-modules i.e. Product, General, and License.

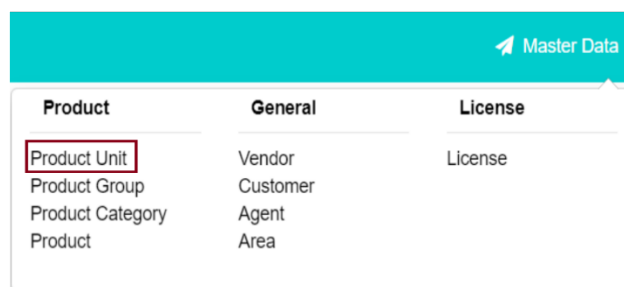

4.1 Product

This Sub-module consists of menus like Product Unit, Product Group, Product Category, and Product. This sub-module helps to add or edit Product units, groups, categories, etc.

4.1.1 Product Unit

The product Unit module is for adding and editing product units. Click on the Product Unit as shown in the following image.

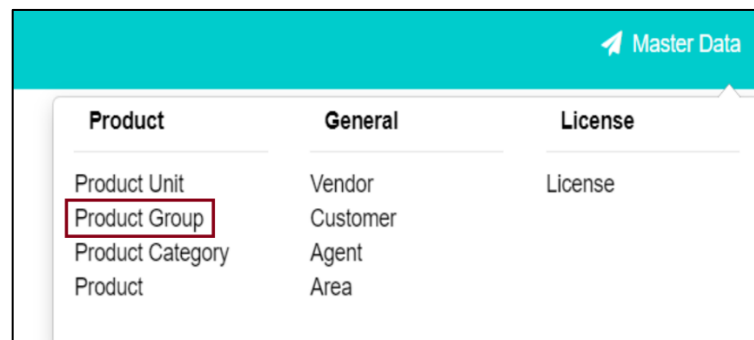

After you click on the Product Unit the following table is displayed. Fill in the Unit name in the button given below the unit's name then click on the Add button.

SN.	Unit Name	
1	Btl	
2	Crt	
3	1/2 Crt	
4	ml	

The User Management Module is for assigning user roles to employees. You must add employee details before assigning a user role.

4.1.2 Product Group

This menu is for adding a specific group of products. Click on the Product Group as shown in the following image.

After you click on the Product group following table is displayed. Then enter the group code and group name, also user can also set the status as active or inactive. Then click on the Add button to save the data. As well as users can edit the data.

SN.	Group Code	Group Name	Status	Add
	003		Active ▾	
1	001	Fruits	Active	
2	002	Vegetable	Active	

4.1.3 Product Category

Here, in this menu, you can add a product category. Click on the Product Category.

After you click on the Product group following table is displayed. Select the group and click on the load button, then a following table is generated where the user can add a product category.

Group	Fruits	Load			
SN.	Category Code	Category	Status	Add	
	003		Active		
1	001	Apple	Active		
2	002	Orange	Active		

4.1.4 Product

The product menus are for adding products and editing products. Click on the product menu as shown in the following image.

Master Data

Product	General	License
Product Unit	Vendor	License
Product Group	Customer	
Product Category	Agent	
Product	Area	

After you click on the Product group following table is displayed.

Click on the Edit product button, Select product group and product category then click the filter button to display the table.

The screenshot shows a web interface for product management. At the top, there are two buttons: 'Add Product' and 'Edit Product'. Below them are two dropdown menus: 'Product Group' (set to 'Fruits') and 'Product Category' (set to 'Orange'). To the right of the 'Product Category' dropdown is a 'Filter' button. Below these elements is a table with the following columns: SN, Product Code, Group, Category, Product, Secondary Unit, Primary Unit Qty/Secondary Unit, and Status. The table contains one row with the following data: SN: 1, Product Code: F2, Group: Fruits, Category: Orange, Product: INDIAN, Secondary Unit: 1 BOX, Primary Unit Qty/Secondary Unit: 8 PCS, Status: Available. There is an edit icon (pencil) next to the 'Available' status.

SN	Product Code	Group	Category	Product	Secondary Unit	Primary Unit Qty/Secondary Unit	Status
1	F2	Fruits	Orange	INDIAN	1 BOX	8 PCS	Available

4.2 General

General is another sub-module of Master Data where we can enter the personal information of Vendors, Customers, and Agents. Here we can add and edit the data of each menu.

The screenshot shows the 'Master Data' menu. It has three sub-menus: 'Product', 'General', and 'License'. The 'General' sub-menu is highlighted with a red box. Below the sub-menus, there is a list of items: 'Product Unit', 'Product Group', 'Product Category', and 'Product'. To the right of this list, there is a list of roles: 'Vendor', 'Customer', 'Agent', and 'Area'. The 'Vendor' role is highlighted with a red box.

4.2.1 Vendor

This menu helps to add and edit the vendor. The user must click on the Vendor as shown in the given image.

The screenshot shows the 'Master Data' menu. It has three sub-menus: 'Product', 'General', and 'License'. The 'General' sub-menu is highlighted with a red box. Below the sub-menus, there is a list of items: 'Product Unit', 'Product Group', 'Product Category', and 'Product'. To the right of this list, there is a list of roles: 'Vendor', 'Customer', 'Agent', and 'Area'. The 'Vendor' role is highlighted with a red box.

After the User clicks on the vendor menu the following table is displayed. The User needs to click on the Add More button to add a new vendor.

Add More
